and Disease.

The mention of sulphur will recall to many of us the early days when our moth-ers and grandmothers gave us our daily cose of sulphur and molasses every spring

It was the universal spring and fall "blood purifier," tonic and cure-all, and mind you, this old-fashioned remedy was

to any other form. He says: "For liver, hidney and blood troubles, especially when resulting from constipation or malaria, I have been surprised at the results obtained from Staart's Calcium Wafers, in attents suffering from boils and pimples and even deep-scated carbuncles. I have repeatedly seen them dry up and disappear in four or five days, leaving the skin clear and smooth. Although Stuart's cabing Wafers is a proportion. culcium Wafers is a proprietary article, and sold by druggists, and for that reasons taboord by many physicians, yet I have of nothing so safe and reliable for construction, liver and kidney troubles and specially it all forms of skin disease as tick retroed.

At any rate people who are tired of pills, catharties and so-called blood "purifiers" will find in Stuart's Culcium Wafers a far afer, more palatable and effective prep-

Beception After Ceremony Often

RECEPTION OFTEN OMITTED. The whole tendency of the present day is to cram as many thines into as short a space of time as possible. People have no time to devote to long and solemn functions. There is an increasing tendency to do away with even the reception, and it is becoming more common to read notices. is becoming more common to read notices of weddings at which the guests are present only at the church or the ceremony takes place with only immediate relatives ent only at the church or the ceremony takes place with only immediate relatives of the contracting porties being present. The wedding dress is frequently dispensed with the traveling dress being substituted for it. Bridesmids are nonexistent and in many cases the registrar's office is the scene of the ecomony.

People take sufficient trouble to send as wedding gifts something that may be of real use or they inquire beforehand as to what is really wanted, thereby avoiding the mistake of presenting people who are going to spend their lives on a ranch in the far West of Canada with assortment of of silver table accessories which will have to be stored in a bank for many years or of providing them with cut glass and fragile china, when they may have to spend their lives in moving from one garrison town to another.

Formerly it was considered necessary for a stri to enter her married life with a subside of clothing which was calculated to last her for five years at least, much of which, owing to the changes of fashion, would in all probability never be worn at all in its original form. Materials, too, in those days were made of more lasting quality than they are now, and there are few brides of to-day who will be able to show their grandchildeen garments which they have worn since the day of their wedding.

Allow FOR PASHION'S CHANGES.

ALLOW FOR FASHION'S CHANGES. Although, no doubt, quite as expensive, if not more so, than the trousseau of menty years ago, and certainly infinitely twenty years ago, and certainly infinitely more claborate, girls have fewer dresses owing to the fact that fashion changes so rapidly that gowns made in October will be out of date in December. It is, therefore, a common thing for the trousseau to be given in two parts, or of a portion of the trousseau money to be held aside by the bride herself in order to have a second installment at the end of six months. Honeymonus are spent in motor cars or in fishing, shooting or some other pursuit, for the modern athletic young woman is not content to spend the days sitting hand in hand with her husband. She must have occupation and amusement, otherwise the dreaded boredom will encompass her even under such conditions.

An attempt has been made to do away

under such conditions.

An attempt has been made to do away with the frock coat for briderrooms, and, indeed, if girls are to be married in a costume designed for motoring or meant inserting, it is well that he attendant was should be allowed shuffar latitude in the matter of dress.

In to the present there has been Up to the present there has been no altempt to introduce into England the American custom of weldings taking place in the bride's own here instead of in a church, an atrangement which simulates still more the question of expense and mercessary formalities, but doubtless it will

come before long. DETERMINED TO FIND HUSBAND

The idea was good, but the remedy was crude and unpetable, on the was good, but the remedy was crude and unpetable, and a large quantity had to be taken to get any effect.

Nowadays we set all the beneficial effects of sulphur in a palatable, concentrated form, so that a single grain is far more effective than a tablespoontul of the crude sulphur.

In recent years research and experiment have proven that the best sulphur for medicinal use is that obtained from Calcium Wafers. They are small choochate coated pellets and contain the active medicinal principle of sulphur in a highly concentrated, effective form.

Few people are aware of the value of this form of sulphur in restoring and maintaining bodily vigor and health; sulphur acts directly on the liver and excretory organs and purifies and enriches the blood by the prompt elimination of waste inneterial.

Our grandmothers knew this when they dosed us with sulphur and molasses every spring and fail, but the crudity and most widely used.

They are the natural antidote for liver and kidney troubles and cure constigation and purity the blood in a way then adoptive from consentrated in sulphur remedies soon found that the sulphur

MRS. SARAH B. PECKHAM DECIDES TO TESTIFY REGARDING COTTON SCANDAL

meations in the hearing over the defunct cotton firm of Sarah De Faye & Co.

It is said that this is to be a white winter in two different senses, the bushes in the country are covered with bernes, nature's way of providing food for the birds against the could snowly white. It is also to be a white winter as ordained by fashion, white clother and brown complexions. Furs, hats and coats—even walking dresses—are to be snowly white or a dedicate shade of cream, but the new white Crusader hat for women is a real surfortial surprise of the season.

Made of flexcy white cloth, it is quite as warm and a quarter of the weight of fur. The Crusader coat is a really giorified grard's coat, which falls in long graceful lines from the shoulders and is secured by a short strap at the back. This strap, which spasses through a buckle of duli
